

Commercial Real Estate

Big Firm Clout. Small Firm Attitude.

When working on a real estate transaction, the size of your attorney's firm doesn't matter. What matters is that your attorney has the ability, experience and responsiveness to successfully complete the transaction. At FMJ, our attorneys combine commercial real estate legal expertise with a practical business perspective to anticipate potential roadblocks and proactively create solutions to complete the transaction.

At FMJ, our real estate experts have years of experience negotiating and completing real estate transactions for developers, owners, lenders, landlords, tenants and contractors in every imaginable type of transaction at the local, regional and national level. FMJ attorneys have directed, coordinated and completed complex multi-transaction development projects involving the simultaneous purchase, construction, leasing, sale and financing of real estate. They have assembled multiple parcels of land for redevelopment and expansion. One area of particular expertise is retail. Whether a grocery-anchored center, mixed-use facility, regional mall or a single tenant site, FMJ knows how to navigate the transaction.

The strategic, proactive and practical solutions provided by FMJ's commercial real estate team will build the foundation for your future success.
