

Estate and Trusts

Efficiency for the Basic, Expertise for the Complex

Estate Planning, Administration and Asset Succession:

An estate plan is a comprehensively designed strategy that ensures a client's personal objectives concerning the administration and succession of his or her wealth are implemented in a tax efficient manner. With each estate plan, whether basic or complex, we educate the client regarding applicable laws, identify the client's objectives and then determine the most effective ways to accomplish them.

At Fafinski Mark & Johnson, our estate and trusts group represents clients in all facets of estate planning, asset succession and estate administration. Expertise and efficiency are the hallmarks of this practice area.
